

Class to save oral history

Dr. Hume to lead students in archaeological inventory

A resource management plan, biological and archaeological inventory are the only things currently holding the Hawthorne Crossing Conservation Area back from being opened to the public. This is where NKU will come into play.

On March 30 Dr. Douglas Hume, assistant professor of Anthropology, along with a contingent of students from the Applied Anthropology class and an independent study class took part in a public meeting at the Licking Valley Baptist Chur
